

Brighton College: COVID-19 Update

Brighton College continues to closely monitor information on the COVID-19 virus. Of primary concern to us is the health and well-being of our students and team members. Due to the nature of our educational online delivery, Brighton College will remain open as there are no face to face interactions among our student population.

Update to our Students:

We realize, that due to current events, your day to day life has been impacted, and perhaps it is necessary for you to share time and resources with other family members. We remind our students that your online classrooms remain open and your instructors and advisors are still available to you. While we expect all our students to maintain academic standards, if this is not possible, please contact your Student Services Representative immediately.

Centers for Disease Control (CDC) recommendations

Just a reminder that the Centers for Disease Control (CDC) recommends that if you are coughing, sneezing, sweating heavily, or having difficulty breathing, or you have a temperature higher than 100.4, please self-quarantine and seek care from your primary care physician or urgent care.

To assist in maintaining a healthy environment, the CDC recommends the following preventative actions:

- Appropriately cover minor coughs and sneezes (tissue/sleeve)
- Clean frequently touched surfaces (Clorox and Lysol wipes can be used for computers, headsets, etc.)
- Wash hands frequently with soap and water for at least 20 seconds or use a hand sanitizer that contains at least 60% alcohol if soap and water are not available. Sing Happy Birthday 2x while washing is approximately 20 seconds.
- Avoid touching mouth, nose, or eyes with hands (including while using smoking or vaping materials)

- Avoid handshaking
- Avoid large crowds, including public transportation
- Stay 6 feet away from anyone symptomatic
- Self-quarantine if you have been overseas and recently returned to the United States or Canada
